

Fresh-roasted coffee at the point of service.

Powering exceptional cafés—from corporate dining to hospital, education, and facilities service environments—with freshly roasted coffee onsite.

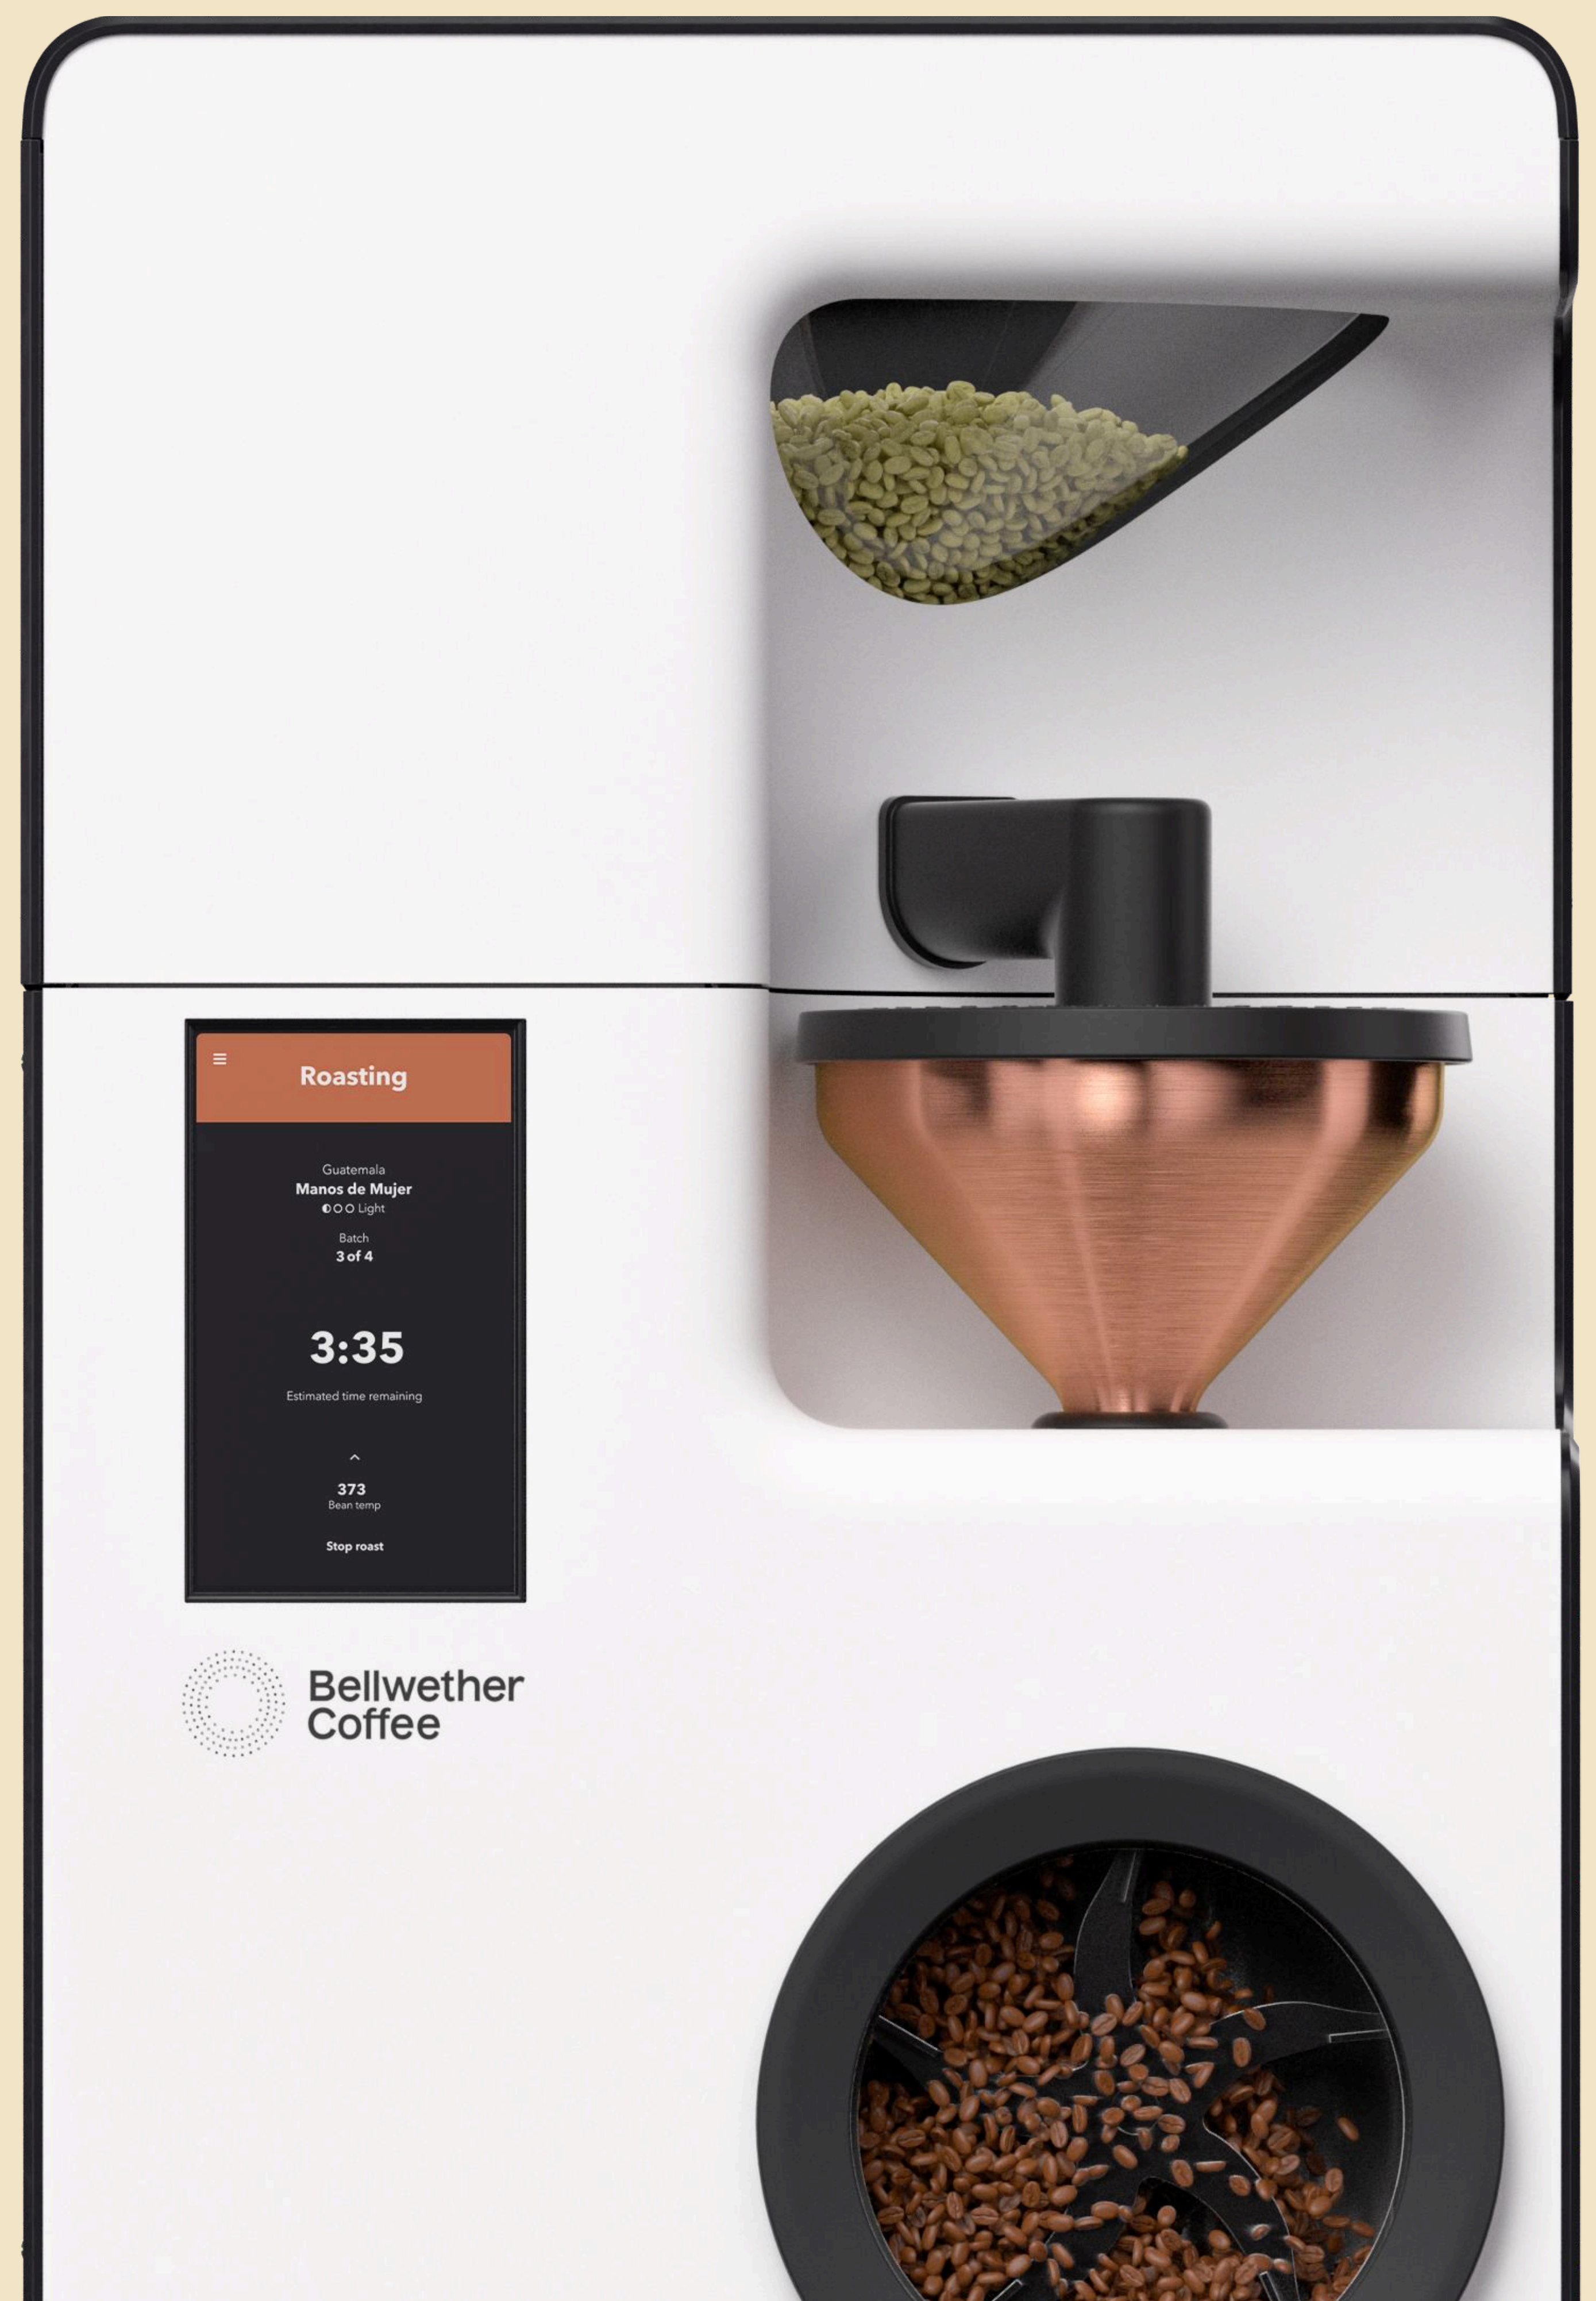

Bellwether Coffee makes it easy to serve better, fresher coffee while cutting costs in half.

Our ventless, electric roaster requires no construction or ventilation—just plug it in and roast automatically with the push of a button.

Paired with our sustainable green coffee marketplace, Bellwether transforms any café, hospital, university, or corporate dining space into a barista-quality coffee experience without added staff or complexity.

Each roast is consistent, customizable, and fully supported with remote monitoring and training, helping you meet both operational and environmental goals effortlessly.
